PRE-RINSE & WASHDOWN SYSTEM

Wall Mount Instinct® Faucet

V-Mount Instinct® Faucet

Mini Wall Mount Instinct® Faucet

FEATURES & BENEFITS

- The Instinct® Faucet consumes less than 1.25 GPM at 60 psi.
- EPA Act 2005 compliant.
- Certified to NSF/ANSI 372.
- Efficient spray pattern rapidly strips food soil, thus significantly reducing hot water usage and energy costs.
- A small pull of the nozzle turns the Instinct® on; release and it's off! There is no separate hang up apparatus for the hose - simply push out of the way to one side when not in use.
- Easy to clean surface.
- Extremely adaptable to most installation requirements featuring unique "V-mount" or wall mount bracket. Optional 6' extension hose with quick connect coupling and vacuum breaker.
- The design does not subject the hose to water pressure when the unit is not in use - saving hose replacement costs and out of service time.
- The Instinct® Faucet features a strong 300 psi hose made of durable neoprene rubber with nylon braiding with polished stainless and chrome-plated body parts.
- Titanium valve seat for added durability.
- Full one (1) year warranty.
